     Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Score

Eye Res. 55:657-662(1992).
-!- FUNCTION: Could be a melanogenic enzyme (By similarity).
-!- SUBCELLULAR LOCATION: Type I membrane protein (Potential).
-!- TISSUE SPECIFICITY: Retinal pigment epithelium.
-!- SIMILARITY: Belongs to the Pmel-17/NMB family.
-!- SIMILARITY: Contains 1 PKD domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            MEDLINE=93122163; PubMed=1478275; Kim R.Y., Wistow G.J.;

-I- FUNCTION: Could be a melanogenic enzyme.
-I- SUBCELLULAR LOCATION: Type I membrane protein (Potential).
-I- TISSUE SPECIFICITY: Preferentially expressed in melanocytes.
-I- DISEASE: Defects in Silv are the cause of the silver coat color which seems to be due to premature death of pigment cells during
